Fig. 4

1. The first part of the paper is devoted to a review of the literature on the topic. It starts with a brief overview of the general theory of the firm, followed by a more detailed discussion of the specific issues related to the topic. The second part of the paper presents the empirical evidence on the topic. It starts with a description of the data used in the study, followed by a presentation of the results of the empirical analysis. The third part of the paper discusses the implications of the results for policy and practice. It ends with a conclusion and some suggestions for further research.
